

PRACTICAL-2

AIM:

Develop static HTML5 skeletons for at least 10 StudentHub pages such as Home, About, Register, Login, Dashboard, Events, Profile, Contact, Admin, FAQ, and Feedback. Use semantic tags and accessibility-friendly structure.

Tools/Technology to be Used:

VS Code, HTML5, browser accessibility inspection tools

About Us

[Home](#) | [About](#) | [Register](#) | [Login](#) | [Dashboard](#) | [Events](#) | [Profile](#) | [Contact](#) | [Admin](#) | [FAQ](#)

 **About StudentHub** 

A platform designed to make student life easier.

 **About StudentHub**

StudentHub is a centralized student management portal designed to provide students with easy access to academic information and college activities.

It brings important student services together in one simple platform.

 **Our Mission**

Our mission is to make academic communication, information management and student services simple, accessible and organized.

 **What We Provide**

-  Student Dashboard
-  Assignment Management
-  Study Notes
-  College Events
-  Important Notices
-  Student Profile
-  Contact Support

 **Learn • Manage • Connect • Succeed** 

 **StudentHub**

Making student life easier.

Key Questions / Analysis/ Interpretation:

1) Are semantic tags such as header, nav, main, section, article, aside, and footer used properly?

ANS:

Yes. Semantic tags such as **header**, **nav**, **main**, **section**, **article**, **aside**, and **footer** are used to organize the webpage content clearly and give each part a proper meaning.

2)Are form labels, headings, image alt text, and navigation links accessible?

ANS:

Yes. Form fields have labels, headings are properly used, images include **alt** text, and navigation links are clearly provided to make the website easier to use and more accessible.

3)Is the page structure consistent across all pages?

ANS:

Yes. The page structure is consistent across all pages. The header, navigation menu, main content area, and footer follow a similar layout, making the website easy to navigate.
